SEASON 1924

16th Annual Catalog  
of STRAWBERRY PLANTS

RASPBERRY PLANTS, GRAPE VINES  
ASPARAGUS ROOTS, ETC.

Hall's True-to-Name Plants are Sure to Grow and  
Produce Big Crops

J. KEIFFORD HALL

SMALL FRUIT SPECIALIST

REIDS GROVE, MD.

I have unsurpassed facilities for prompt and safe shipment  
to all points, and I always secure the lowest rate possible

## Friends and Customers

Another year has rolled around, and the time for presenting a descriptive catalog has arrived. Now I want to take this opportunity to thank every customer, who has had confidence enough in me to give me their patronage in the past, and for those who have told their friends and neighbors where they could get good plants and roots.

My crop of plants is not as large for this spring as last, the growing season was not as favorable; but they are large, thrifty and free from disease.

This is my sixteenth annual catalog. I will say for the benefit of those who has not been receiving it, you have been missing a book full of facts. Please do not write for anything you do not find listed in here; if it is not listed, I do not have it in stock.

There is not a Nurseryman nor a Seed House in the business, that is more anxious than I am for a customer to get good stock, well rooted, and true-to-name, for I realize if I do not give a dollar's worth of goods for every dollar sent me, I cannot succeed. I am anxious to succeed, so if you have never given me your order for plants, etc., do so this spring and see if you do not think I should succeed.

You are absolutely assured when you place an order with me, that I will do everything in my power to make you a satisfied customer.

My many customers all over this country, will verify what I say.

I appreciate every order whether large or small, because many times the small orders develop into large ones.

I have been compelled to raise the price of plants a little, because labor is high and scarce, and yet I am not as high as some.

When you buy of me, you do not have to pay for the name, you get your whole money's worth in plants. This one fact should merit your order along with the assurance you will get good stock, true-to-name, and when planted right will produce you a big crop of large luscious fruit.

Yours for success,

**J. KEIFFORD HALL,**

The Small Fruit Specialist.

P. S. I work with the idea of making every customer a booster for "Hall's true-to-name plants." Let me make you one.

## Please Read Carefully

All of my plants are grown on a light sandy loam, which makes the plant roots bright and long. When properly planted they will stand the drouth and continue to grow. I grow my own stock and do not dig until ordered. This makes them fresh. My plants are put in the best condition possible, by experienced hands. I claim that I send to my customers as good plants as can be procured of any nurseryman in this country, and the many testimonials that I receive is convincing evidence. Give me your order and become a yearly customer.

I do not attempt to grow all varieties that are grown. I try to grow the ones that I can honestly recommend to the public. Please do not order plants that I have not listed unless you will allow me to substitute.

**MY MOTTO.** Once a customer, always a customer.

**PARCELS POST.** My mail package is light, and yet substantial that I can deliver plants to your door in perfect shape, and don't believe there are any better plants to be obtained anywhere.

**BY FREIGHT.** I ship plants this way, but it is always with the understanding that it is at purchaser's risk.

**PAYMENTS MUST BE MADE IN ADVANCE.** but orders will be booked and held, providing a remittance is enclosed with order, and when balance is paid order will be forwarded.

**C. O. D. ORDERS,** will be accepted and promptly filled, but when made out for large order, a part of the money must accompany order, or satisfactory reference given.

**SUBSTITUTION.** It is not always possible for us to have plants of all the varieties we have listed, late in the season, but if allowed we can often substitute a better variety and thus save time, which is very important. Please indicate in order if you object to substitution. If you don't we will take it for granted that substitution is satisfactory.

**REFERENCE.** (By permission). Cashier Bank of Morion, Marion Station, Md., Postmaster, Rhodesdale, Md.

**NURSERY INSPECTION.** Copy of certificate attached to each shipment.

**STRAWBERRIES** Should be grown by every person who has a rod of ground. They can produce on almost any soil, and there is no fruit so delicious or healthful. If you had no strawberries on your table last year, don't repeat the loss this season.

**HOW BEST TO REMIT.** By registered letter, bank draft, check to my order, postoffice money order or express order.

**SHIPPING SEASON.** In fall from September 1st to January 1st. Spring from February 1st to May 10th. It frequently happens that I can furnish plants to Southern customers all through the winter, note a time when the ground is not frozen.

**CUSTOMERS.** Your order, when received, will be shipped as prompt as possible. I am rushed at times, but will get your order out at first opportunity; I believe in prompt shipments.

**LOOK.** I do not dig plants before order is received, in either spring or fall.

**GUARANTEE.** All plants are guaranteed to be true to name, and I will replance any plants found otherwise, but in no case will I be responsible for damage beyond first cost. Safe arrival of all plants sent by mail.

**NURSERYMEN and DEAEELRS.** Send me your Want List. If you want something that will please your customers, you need not go any further. I guarantee you a square deal.

Express shipments are not guaranteed.

#### SHIPMENTS BY PARCELS POST.

Plants of all kinds are now admitted to the mails as Fourth Class Matter maximum weight 70 lbs. in first zone, 50 lbs. in all other zones. I cannot give estimates on plants for some varieties are larger and weigh more than others. The best way is to let me ship your plants to you C. O. D. for the postage. I have been doing this and find that my customers are well pleased. It is much safer while the Express Companies are congested as they are. I will not guarantee anything by Express.

Packages of any considerable size will have to be shipped by express.

#### STOP, LOOK AND READ

Quality your first consideration. There are a great many plant dealers Some are selling plants that have had little experience in growing or fruiting them. It is your duty to know when you place your order who you are placing it with. I for my own self would prefer one that has had experience one who knows the habits of the different varieties, and one who knows what is best for the different localities, also know that the plants are true-to-name, free from disease and well rooted.

I have spent my whole life in this business. I make it a study day in and day out. I claim to be a specialist. Every order is given my personal attention.

I do not get out an expensive catalog. I could do it. I prefer giving my customers the benefit of the extra cost that would be attached to a beautiful catalog, in quality of plants.

Germantown, N. J., December 5, 1923.

My Dear Mr. Hall.

Plants were O. K. finest bed in town. Unless labor become available, will have to stop fruit growing. Should things change, will be glad to purchase from you such plants as I need, and you can furnish.

Very sincerely,

C. M. ROCKEFELLER.

Marshfield, Vt., December 6, 1923.

Dear Sir:—The plants came in fine condition and considering the very dry season, they have done remarkably well. Did not loose but a very few. When in need of more, will know where to go.

Very truly,

H. P. DARLING.

---

# STRAWBERRIES

## DESCRIPTION OF VARIETIES

### HORSEY

#### THE GREAT EARLY STRAWBERRY

**HORSEY, (Perfect)** You who have been reading this catalog regularly, know what I have said about this great berry. It was offered to the public by me for the first time, in the spring of 1919. It has been tested over a wide section of this country, and has proven to have been better than I had claimed for it. It is known as "Frost Proof," the reason for that is that in 1920 and 1921, when varieties like Early Ozark, Excelsior, and Dunlap produced practically no crop at all, "Horsey" produced from 90 to 95 per cent of a crop, and another thing about this berry is that all berries are perfect, no seedy ends, cox combed, one-sided ones. They are oblong, and taper off, but not real sharp. When packed, they are beauties. I have claimed that it would produce nearly as many quarts per acre, as "Premier." Many growers say they produce more, one beside the other, under same conditions. They will do as well on high, light land, as "Premier." In the first place, they are firm; will ship anywhere. If it rains, you need not worry about the fruit getting soft. Really, it seems to have a tendency to make them firmer.

It is earlier than Premier. The berries bringing highest market price. The plants are very large, strong, healthy growers, entirely free from any blight or disease of any kind. Color, a deep red all through; sour. The calyx is large and a dark green which adds to its beauty. It makes a fine bed of deep-rooted plants which will stand drought, and produce its crop. It is a strong bi-sexual variety, and will make a good pollinizer for imperfect varieties. I have tested and have seen tested, many varieties, I honestly believe that the "Horsey," is going to be the berry that will fill the long felt want in an early berry. What more is needed? It is early as the earliest, practically frost-proof, good plant maker, heavy cropper, of large size berries that hold up whole season through. Firm, good shipper.

I am only using two testimonials, space will not permit more. You can see what these two customers think of this wonderful berry.

I am making price of the plants in reach of all. You had better order early, crop of plants not large.

---

### The Horsey is firm and a heavy bearer

Silver Spring, N. Y., November 26, 1923.

Mr. Hall.

Dear Sir:—With me the "Horsey" strawberry proved to be a heavy bearer, also early and of long season. A good plant maker and the firmest and sourest strawberry I ever fruited. We liked it for canning, but sour for table use.

Yours very truly,

L. B. ENCKER.

## Not One Out Of 6,000 Plants Died

Crapo, Md., November 27, 1923.

Mr. Hall.

Dear Sir:—The "Horsey" strawberry plants that I bought of you did fine alst season, taking everything in consideration. I believe the "Horsey" to be one of the greatest berries I ever saw. The plants are large, strong and vigorous growers, making nice beds of healthy, dark green plants, which produce heavy crops of the finest berries. The "Horsey" will stand dry and cold weather, better than any variety I ever saw. My plants stood the dry weather last season and produced a perfect crop of fine berries, while some of my best varieties died on th hill. At the present time (last of November) my patch of "Horsey" is green and in fine growing shape, while my other varieties have lots of dead leaves, showing the effects of the heavy frosts and cold weather.

The Horsey is very early, about a week ahead of Premier with us. The fruit is large, with a good flavor, and a handsome dark red color through and through, making it attractive. The berries are firm, making it a great shipper. They are as fine as I ever saw. It is a splendid shaped berry, so perfectly made that it looks like it was moulded. They grow well on any kind of soil, light or heavy, I have tested them. I just believe the "Horsey" to be one of the best strawberries in existence.

I also want to say a few words in reference to all the plants I bought of you. They were fine. I bought 6,000, and not one of them died. I do not think anyone can go wrong in buying your plants. I am

Yours respectfully,

OLIE L. FOXWELL.

**THE BEST.** It surely has the right name, if I know anything about a late berry. It is the Best I have tested. With me last season, I saved only a few plants for testing; the fruit was large, firm, large double-cap, which when packed, was beautiful. It was later than Lupton with me, heavier cropper than Lupton or Gandy. It is a good grower of large plants, deep-rooted, resembles Gandy, but far better. I certainly like it and advise planting it as soon as as you can get the plants. I am limited myself, on plants. If you want any, you had better order early or else write me before ordering.

**LUPTON. (Perfect)** Hails from New Jersey. It is a great favorite as a late berry, very large, as firm as Klondyke, more productive than Gandy or Chesapeake. In plant growth and vigor, it is as good as the best. I have fruited it two seasons and I can recommend it to all customers. The fruit is large, round, with large double green cap, which makes it very showy and brings the highest price in market. If you want a late berry, plant Lupton.

**PREMIER. (Perfect)** Early, begins to ripen with Klondyke. It is very large and remains large through a long season. It is very common to hear of Premier producing 250 to 300 bushels per acre of berries of the finest quality. The foliage is light green, a good plant maker, a flavor delicious. If you are looking for something for a garden to last over a long season, plant Premier. It is firm, but does not seem to carry well under refrigeration.

**BRANDYWINE. (Perfect)** Late. Fruit extra large and very firm. Has unequalled shipping qualities. It is standard variety the country over. Very productive.

**NORWOOD. (Perfect)** Mid-season. One of the very largest strawberries grown. Fruit bright red, of good quality. Does not do well south of Pennsylvania.

### KLONDYKE

**KLONDYKE (Perfect)** Medium early. Fruit extra large and very firm. One of the leading early varieties here at Selbyville, Del., the largest strawberry center in the world.

**SHARPLESS.** An old and well known berry, especially desirable in home gardens. Fruit large and of excellent quality.

**JOE JOHNSON, BIG JOE. (Perfect)** Late. Ripens with Chesapeake. Fruit is firm and of large size, has a good flavor, no green tips, wonderfully productive; plants are strong growers, thrives on any soil that will produce strawberries. If you are not growing Joe Johnson, plant heavily of them this spring. You will not regret it.

**WARFIELD.** Berries glossy, dark red, rich, exceedingly juicy; very firm. Popular canning variety and a superior shipper.

**MISSIONARY. (Perfect)** Early. For the early market this variety is known as Queen, while Klondyke is King for the South. Both varieties are now being extensively planted all over the country. Fruit is large, firm, and beautifully shaped. Very productive.

**EXCELSIOR. (Perfect)** Extra early. One of the first to ripen. An old standard variety suitable to all sections of the country where strawberries can be grown.

**NICK OHMER. (Perfect)** Ripens between Parsons' Beauty and Gandy, just at the time late berries are much sought for. An old standard variety. Fruit is very large and firm, a general favorite in any locality.

**MASCOT. (Perfect)** Late. Begins ripening about three days after Gandy first begins ripening. Fruit is very fine, and as large as any we know of. We have extensively planted this variety for fruiting purposes. It is a good one and has come to stay. Bears his crop of big, firm, red berries. Extensively planted in all strawberry sections of the country.

**NEW YORK. (Perfect)** Mid-season. A popular mid-season variety. Plants are large and healthy. Fruit very large and ordinary firm. Noted for producing extra crops on very poor soils. Extensively planted all over the northern half of the United States.

**PRIDE OF MICHIGAN.** Same as New York.

**HUNDRED DOLLAR.** Same as New York.

**McKINLEY.** Same as New York.

**UNCLE JIM.** Same as New York.

**OSWEGO.** Same as New York.

**RYCKMAN.** Same as New York.

**GANDY. (Perfect)** Late. For this locality, and many other sections of the country, this is one of the best late varieties. Fruit is very large and very firm. Is noted for firmness and good shipping qualities.

**CLIMAX (Perfect)** Early. A very heavy yielder of very large, round berries, firm and a good shipper.

**WM. BELT. (Perfect)** Mid-season. Fruit is very large and firm, of a delicate flavor. Succeeds on a great variety of soils. A very good one.

**SAMPLE (Imperfect)** Medium late. Extensively planted throughout the North, Middle and Western States. Very productive of large well made berries, firm for long distance shipping. A standard variety.

**PARSON'S BEAUTY (Perfect.)** Mid-season. A very strong pollenizer. Fruit is very large, firm enough for long distance shipping. A good all-around berry. Extensively planted all over the country.

**SUCCESS. (Perfect)** Mid-season. One of the best mid-season varieties. Makes wonderful yields on any soil that will produce strawberries of any kind. Fruit is large to extra large, bright scarlet color; flavor is mild, sweet and rich; ordinary firm.

**MARSHALL. (Perfect)** Mid-season. A good plant maker of choice, strong, well-rooted plants; fruit large to very large, colored through and through, flavor as fine as one could wish; very firm and a good shipper. A standard variety.

Newport, Pa., November 24, 1923.

Mr. J. K. Hall.

Dear Sir:—The plants purchased of you last spring arrived as usual in fine condition, and have made fine growth. I expect to order more of you next spring if everything goes good. I certainly am not afraid to recommend your plants.

Please send me catalog when issued.

Yours respectfully,

JOSEPH P. JONES

**CHESAPEAKE. (Perfect)** Late. Ripens a little earlier than Gandy but holds out about as long and much more productive, without green tips. Has a beautiful appearance, extra large, even in shape and uniform in size; plants are strong and healthy, dark green in color, rich and vigorous, no rust, no disease, in fact no weakness of any kind. This is a good one and is well known and extensively planted where strawberries are grown.

**CHESTER. (Perfect)** The Chester was originated at Chester, Pa., and has been grown for several years by two or three men in Kent county, who are expert growers. They had never sold many plants before this time. It is said to be better than Chesapeake and I have it from good authority. If it is it sure is a dandy. It is a mid-season variety, ripens a few days before Chesapeake, makes good beds of very large deep-rooted plants; very productive and larger than Chesapeake. Very firm, good shipper.

**AROMA. (Perfect)** Late. Planted in all sections of the country, especially in the Middle West and Southern States. Fruit is very large, but not of the largest. Quality unsurpassed. Very productive.

**EARLY OZARK. (Perfect)** Extra early. The best early variety for the Northern half of the country. It is enormously productive of berries larger than Klondyke, of the Excelsior type, but twice as large and very firm. Plants are big and strong. A very good variety.

**HAVERLAND. (Imperfect)** Mid-season. Fruit very large and conical; plants strong growers. An old standard variety that has been tested for over a generation and is just as good today as it ever was.

**TENNESSEE PROLIFIC. (Perfect)** Mid-season. A well-known standard variety. Like Parsons' Beauty, succeeds over a great extent of the country. Fruit is large, bright red, ordinary firm. Very productive.

**STEVENS' LATE CHAMPION. (Perfect)** Late. Extensively planted throughout the Northern States. A descendant of the Gandy, but will produce twice as many berries of large size, but not as firm as Gandy.

**KLONDYKE. (Perfect)** Of Southern origin. Production firm. Brilliant colored and famous on all markets as a re-shipper. Great plant maker. All commercial growers should plant it.

**LADY CORNEILLE. (Perfect)** Early. Fruit is large and well shaped, firm and a good shipper. Plants free from disease. Extensively planted in the South.

**REWASTICO. (Perfect)** Late. Introduced by W. F. Allen. Fruit is large and very firm. A good plant maker. In fact a good all around berry.

**BUBACH. (Imperfect)** Mid-season. An old standard variety well known the country over. Fruit extra large, bright red; foliage very strong, of dark green color. Very productive.

**SENATOR DUNLAP. (Perfect)** Early Mid-season. A reliable market berry. One that succeeds in all parts of the country. Very productive. Fruit is medium to large, very firm and attractive. Always sells for top prices.

**WOLVERTON. (Perfect)** Have fruited Wolverton for several years and find it to be much in demand. Is a good plant maker and produces an abundance of fine large berries. Suited to all soils that will grow strawberries and does much better on high, light soil than a great many other varieties. Long ripen season from early to mid-season. Fine shipping qualities, also excellent table fruit. Try it.

**GLEN MARY. (Perfect)** Mid-season. Like Klondyke, a perfect flowering variety but not suited to plant with imperfect flowering sorts, as it only furnishes enough pollen for its own use. A standard variety throughout the North half of the country. Fruit is extra large, firm. Always brings top prices.

**KELLOGG'S PRIZE. (Imp.)** This new variety, introduced by Mr. Kellogg, of Michigan, seems to be just what we have been looking for, for a long time—that is, a good, imperfect variety. It has more good qualities than nine-tenths of the varieties that I have fruited. Good size, solid, heavy cropper, and a strong grower. I should judge that a field of this variety, fertilized with Joe Johnson, or Chesapeake, would be about the best of anything in strawberries. Be sure to try this one.

**DR. BURRELL. (Perfect)** This berry was originated by Dr. Burrell, who originated the Senator Dunlap, which has been worth millions to berry growers. He says it is a scientific cross of Senator Dunlap and Crescent. In plant growth it is a marvel. Its foliage is large and of a beautiful dark green. In the production of fruit it surpasses either of its parents. Its berries are large and beautifully formed. Color a deep glossy red, a trifle lighter than Dunlap. The meat is solid and rich, the berries are excellent shippers, and splendid keepers. The calyx is a bright green, seeds yellow. This is a strong bi-sexual variety and has a long blooming season, making it unequalled for a pollenizer for pistillate varieties.

**HOWARD 17. (Perfect)** I have fruited this variety and I cannot see any difference in any way from Premier. So if you have Premier, leave off Howard 17.

**ABINGTON. (Perfect)** Mid-season. Similar to Bubach, but much firmer and brighter in color. Plants very prolific; fruit very large. A good one.

**SUPERIOR. (Perfect)** A good plant maker. Fruit is medium to large and very firm. Great canning berry.

**MICHAEL'S EARLY. (Perfect)** Extra bright scarlet, conical—an old and popular variety and an excellent table berry of good flavor. Those who have a garden and want a few for eating purposes will do well to try it.

#### NO DISTANCE TOO FAR

Texas, March 19, 1923.

Mr. Hall.

Dear Sir:—I received the Missionary strawberry plants today and will say they arrived in first-class condition. I couldn't wish for better plants than they are. Several growers saw them, and were surely pleased. Anyone in want of plants, I can surely recommend you.

Thanking you for such good plants,

Very truly yours,

R. C. WILLIAMS.

New Jersey, December 5, 1923.

Mr. Hall.

Dear Sir:—The strawberry plants purchased of you last spring arrived in very good condition and have made a good growth. I do not think anyone could ship better plants than the ones you shipped me. I shall want more next spring.

Yours,

M. BONNELL.

## Fall or Everbearing Strawberries

A great many people think that the Fall or Everbearing Strawberries is a fake. If you were to happen here in September, October and even the first part of November, you would not say it is a fake.

You can set these plants in early spring and have fruit from them from August until the ground freezes. I mean to say lots of it, the same year. Every garden should have some of them in it. Don't forget to include some Fall Bearing in your order. You will be more than pleased. Wouldn't it be nice to have strawberries all summer and fall.

**PROGRESSIVE. (Perfect)** A genuine fall bearing. This is, without a doubt, the best one; plants of good size, deep rooted and makes as many plants as most of the standard varieties. The fruit is of medium size, dark red and the flavor is unsurpassed. To obtain best results, keep blossoms off until August 1st, then when they begin to ripen you will have something you will be proud of. The runners from the young plants bear a nice lot of fruit. Be sure and order some of these plants.

**SUPERB. (Perfect)** Another fall-bearing and a good one. The young plants don't produce fruit the first season. The second season it produces fruit the same as any other variety, and in the fall produces a full crop. The fruit is large. Dark red, good quality, and a very heavy cropper. Plants strong and healthy.

**1017 MINNESOTA.** Is truly a fall-bearer, very heavy cropper, fruit large and flavor delicious, in plant growth it ranks with the Senator Dunlap, plants very large; foliage dark green and tall, the leaves are very large. I have never seen as many good berries of the fall-bearing varieties and of as large size as I saw of the 1017 Minnesota this past fall. You will not make any mistake in trying them. I especially urge all of my customers to get a few of them anyway.

**NEVERFAIL.** Originated by Mr. D. J. Miller, of Ohio, a veteran strawberry expert, and recommended by Matthew Crawford. Introduced by L. J. Farmer. It is a seedling of the Superb, and resembles it very much, both in fruit and plant, but is more productive as a fall bearing variety than superb. It is larger and better quality.

It has made a good bed of plants this season and I picked some as large berries as I ever saw. You need not be afraid to order some.

Government of Porto Rico.  
Rio Riedras, P. R. December, 6th.

Chief Bureau of Supplies,  
San Juan, P. R. Div.

I am in receipt of your letter embodying another from the Purchasing Agent to you in which he requests information as to the condition in which the strawberry plants delivered by J. Keifford Hall, Reids Grove, Md., were received and how they are turning out.

In this connection please be informed that the plants were received in fine condition and were planted the day of arrival. Report of growth and fruiting, of course, will come later.

Respectfully,  
(Signed) R. MENENDEZ RAMOS, Director.

## Grape Vines

	Each	10	100	1000
CONCORD (Black) 1 yr.....	.20	\$1.25	\$ 8.50	\$62.50
MOORE'S EARLY (Black) 1 yr.....	.20	1.75	12.00	87.00
CONCORD (Black) 2 yrs.....	.40	2.50	15.00	75.00
MOORE'S EARLY (Black) .....	.40	3.00	17.00	125.00

## Asparagus Roots

When planting Asparagus roots, set four to six inches deep, and about 12 inches apart in the row, covering with only three inches of soil at first and filling the trenches as the plants grow.

**PRICES:** One year, 100, \$1.00; 1000, \$6.00.

Two year, 100, \$1.25; 1000, \$8.00

Prices on application for smaller or larger lots than quoted above.

**CONOVER'S COLOSSAL.** Large rapid grower, productive and of very fine quality.

**PALMETTO.** Of Southern origin; a variety of excellent quality; hardy, very large. All who have used it pronounce it very fine.

**GIANT ARGENTEUIL.** This variety is largely grown in France, and has become adapted to our soil and climate. Is noted for its earliness, productiveness and immense size of stalks. Remarkably healthy.

**MARTHA WASHINGTON.** This new Asparagus was sent out by the Department of Agriculture at Washington, as superior to all other varieties, on account of its freedom from blight and other diseases. It is claimed to be larger and more productive, than other kinds, and more satisfactory in every way. My plants are fine and large.

One year, 100, \$1.25 1000 \$ 8.00

Two year 100 \$1.50 1000 \$10.00

Samples of one and two year old Asparagus sent upon request, of any variety.

## Raspberry Plants

**GREGG.** A good black cap, large, late hardy, prolific. A good shipper, popular.

**CUMBERLAND.** The business black cap, large, good quality, free from disease. Prolific, one you would like.

**KANSAS.** The best early black cap. Prolific, fine quality, vigorous, one of the best.

Price 75c per 25. 50—\$1.25, 100—\$2.00, 250—\$4.50, 500—\$7.50, 1000—\$15

**ST. REGIS (Red)** 75c per 25. 50—\$1.25. 100—\$2.25. 250—\$5.00. 500—\$8.00. 1000—\$16.00.

## Dewberries

**LUCRETIA.** Is the best. Large, sweet, jet black, heavy cropper, very firm, good shipper, and a very profitable berry.

\$1.00 per 25. \$1.75 per 50. \$2.50 per 100. \$7.50 per 500. \$15.00 per 1000.

# Giant Himalaya Berry

## FRUITS FOR FOUR MONTHS

This wonderful berry which is sometimes called Grape-Vine Berry, was recently introduced from the cold regions of the Himalaya Mountains. There are several different forms of it, but this one seems to be the only one of genuine value. It grows like a grape vine, making a growth of twenty-five feet, and can be trained to a trellis of any kind.

The fruit is large, black in color, almost coreless, and unsurpassed for eating picked fresh from vines or cooked, canned or preserved in any form. Plants do well in the hot, dry sections of the South and West and are making wonderful records in the middle, Northern and Eastern States.

This is certainly a most wonderful berry because the vines do not die down after fruiting, as in the case with other berries. It is perfectly hardy everywhere, there being no winter in the United States too severe to kill it. It has stood 20 degrees below zero, with no signs of winter killing.

It is valuable for city people or anyone within limited space who desire an abundance of luscious berries. Price of strong well rooted plants: 25c each; 3 for 50c; 6 for 75c; 100 for \$8.00.

I will allow a 5 per cent. discount on all orders sent me before March 1st, when full amount of cash is sent with order for future shipment.

## CUSTOMERS SHOULD PLACE ORDERS EARLY

While I have a large stock of plants of most all varieties, if you wait until you need your plants you might not be able to get them, for I am liable to be sold out of the variety you want. I do know this—there is going to be a large demand for plants this spring, and if you do not place your order early you might not be able to get them. Every year I have to return many orders. I am warning you and if you send in your order late for plants and I am sold out, do not blame me. A word to the wise is sufficient. If you place your order the plants will be reserved for you.

## FALL PLANTING.

I have been selling plants for fall setting the past 14 years, and my business has grown beyond expectations. I find that fall setting is growing in favor with a great many growers. Personally I think it a good thing, especially if you are growing them for "hill culture," you can set them out in September and October and get your crop next spring and you have saved a whole year of expense hoeing, cultivating and pulling out weeds and grass. On the other hand if you are growing them under the matted row system, if you set them in the fall you will have them set and out of the way when your spring work is rushing you. Besides you are sure of a good stand and when they start off in the spring they will have longer to grow, which insures a heavy matted row of strong plants ready for next years crop.

When you receive this catalog and you do not want to order in the spring, keep it and when the fall comes just drop me a postal asking me for my fall price-list, which will be sent you at once. there is one thing that I want to impress upon you—it makes no difference if you order from "HALL" spring or fall you will get what you buy and that which will be true to name and free from disease.

Do not forget that I do not issue my fall price-list before Aug. 1st. I begin to ship plants Sept. 1st., for fall planting.

**HORSEY**—Is some early berry and if you don't get it now you will eventually. Don't forget the "HORSEY." IT WILL PLEASE YOU.

## Price List of Strawberry Plants

Early to Mid-Season		Per 1000			Per 1000

**NOTE**—Early in the season we usually have in stock everything listed in this catalog but late in the season we frequently run short of some of the varieties, therefore, when you order late please state whether we shall substitute something equally as good and as near like the variety ordered as possible or return your money for any stock we may be out of. Answer:

## Some Planting Suggestions

All varieties of the Strawberry give the greatest yield and the largest berries when grown in rich soil; hence no pains should be spared in preparing the bed carefully before planting, by digging or plowing deeply and turning under a liberal application of well-rotted manure. Pulverize the surface soil thoroughly with harrow and rake, and if a top-dressing of ground bone can be applied, it will be found a great benefit at fruiting time. Select a location where the soil is moist and deep if possible—moist and yet where water does not stand near or upon the surface. In such a soil well-enriched, Strawberries delight and give marvelous results. They will, however, succeed upon any soil if well manured. Strawberries do not succeed when planted in shady locations; hence in selecting a plot for them be careful to avoid places that are shaded by trees.

For hill culture in the family garden, set plants in rows two feet apart and the plants fifteen inches apart in the rows; or if to be worked by horse and cultivator, have the rows three feet, and the plants one foot apart in the row. In either case, cut off the runners as they appear. If to be grown in matted rows, plant in rows three and one-half or four feet apart and the plants fifteen inches apart in the rows, permitting the runners to set in the row so as to be about six inches apart each way. The after-culture consists in keeping the soil mellow and free from weeds by frequent hoeing and cultivation. If you live in the North, where you are subject to severe freezes, I would advise you to mulch your plants. At the approach of winter (as soon as the ground is frozen sufficiently to support the weight of horse and cart) cover the entire bed with straw or other loose light material. Light strawy manure is excellent for this purpose, and the soluble portion leaches into the soil and affords nourishment to the plants, while the fibrous portion remains upon the surface as a mulch. Evergreen branches are very useful for holding the mulch in place and are of themselves a protection. When the plants start growth in spring, rake the mulch from off the plants sufficiently to permit them to push through it, and leave it on the surface about the plants to protect the fruit and keep it clean and also keep the soil moist and cool. An application of unleached wood ashes or muriate of potash along the rows very early in spring, just before a rainfall, will be found to increase the size, beauty and flavor of the berries.

## Certificate of Nursery Inspection

### To Whom It May Concern:

THIS IS TO CERTIFY, That on the 9th day of August, 1923, we examined the Nursery Stock of J. Keifford Hall, growing in the nurseries at Rhodesdale, County of Dorchester, State of Maryland, in accordance with the law of Maryland, 1898, Chapter 289, Section 58, and that said nurseries and premises are apparently free, so far as can be determined by inspection, from the San Jose Scale, Peach Yellows, Pear Blight, and other dangerously injurious pests and plant diseases.

This certificate is valid after August 1st, 1924, and does not include nursery stock not grown within this State, unless such stock is previously covered by certificate and accepted by the State Entomologist and State Pathologist.

ERNEST N. CORY, State Entomologist.  
C. E. TEMPLE, State Pathologist.

College Park, Md., August 15, 1923.
